# **Historic, Archive Document**

Do not assume content reflects current scientific knowledge, policies, or practices.

The prices contained in this list we believe to be as low as possible and do justice to the buyer and the grower as well. This is not a cheap cull stock being, put on the market at a cut rate but a Puget Sound grown product which has been inspected by agents from the Washington State Dept. of Agriculture thus insuring to the buyer a clean healthy.free from disease bulb.

#### SUBSTITUTIONS

We never substitute one variety for another unless we are asked to do so by the buyer. however. If we are out of the size ordered we do use the next size smaller in equal value of order received but it must be in the same variety ordered. Late in the spring a second choice is advisable because some stock is limited and soon runs out.

### GUARANTEE

All bulbs are guaranteed to be true to name and free from thrip and disease. Bulbs proving otherwise we will cheerfully replace or return your money. In other words you must be satisfied. The repeat orders we receive from our old customers proves to us that satisfaction to the buyer is our best advertiser.

# MAIL CRUERS

Orders from this list will be mailed any where in the United States. Postage paid. However we do not solicit orders for less than \$1.00 to be delivered by mail.

# GROWING OF STOCK

Our stock has always been grown on new soil each year. Fublet plantings when dug averaging 2's - E's and 4's. Insuring high crown young bulks in these sizes. This extra fine growth is not caused by over fertilizing but is due to the rich deposits of silt brought over the ground at flood stages.
